Kit Numbers

- This installation manual covers the following front bumpers.

Kit Number	Description
KLM-402021017-002040000	2017+ F250 - Delta - No Sensors - Stock Width
KLM-402021017-002041500	2017+ F250 - Delta - No Sensors – 1 ½” Wide Width
KLM-402021017-001040000	2017-2019 F250 - Delta – Adaptive Cruise - Stock Width
KLM-402021017-001041500	2017-2019 F250 - Delta – Adaptive Cruise – 1 ½” Wide Width
KLM-402022017-002040000	2017+ F350 - Delta - No Sensors - Stock Width
KLM-402022017-002041500	2017+ F350 - Delta - No Sensors – 1 ½” Wide Width
KLM-402022017-001040000	2017-2019 F350 - Delta – Adaptive Cruise - Stock Width
KLM-402022017-001041500	2017-2019 F350 - Delta – Adaptive Cruise – 1 ½” Wide Width
KLM-402023017-002041500	2017+ F450 - Delta - No Sensors – 1 ½” Wide Width
KLM-402023017-001041500	2017-2019 F450 - Delta – Adaptive Cruise – 1 ½” Wide Width
KLM-402021020-001040000	2020 F250 - Delta – Adaptive Cruise - Stock Width
KLM-402021020-001041500	2020 F250 - Delta – Adaptive Cruise – 1 ½” Wide Width
KLM-402022020-001040000	2020 F350 - Delta – Adaptive Cruise - Stock Width
KLM-402022020-001041500	2020 F350 - Delta – Adaptive Cruise – 1 ½” Wide Width
KLM-402023020-001041500	2020 F450 - Delta – Adaptive Cruise – 1 ½” Wide Width

Introduction

- **Important**

It is important that the entire installation instructions be read thoroughly before proceeding with bumper installation.

- **Product Installer Responsibilities**

Installer is responsible for installing this product in accordance with Kelderman Mfg. Inc. specifications and installation instructions.

Installer is responsible for providing proper installation of vehicle components and attachments as well as required or necessary clearance for suspension components, axles, wheels, tires, and other vehicle components to ensure a safe and sound installation and operation of this product.

- **Product Owner Responsibilities**

Owner is solely responsible for pre-operation inspection, periodic inspections, maintenance, and use of the product as specified by Kelderman Mfg. Inc. Of particular importance is the re-torque of fasteners. This re-torque must be performed within 90 days or 1000 miles of this product being put into service.

- **Definition of Terms**

- **Warning:** Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.
- **Caution:** A potential hazardous situation may result in property damage.
- **Note:** Provide information or suggestions that help correctly perform a task.
- **Torque:** When italicized "*torque*" alerts the installer to tighten fasteners to a specified value.

Safety

- **Your Safety and the Safety of Others is Very Important.**
Read and understand all safety precautions and instructions before installing this product.

- **CAUTION: Trucks Equipped with Parking Sensors or Other Like Devices.**
Relocation of these devices will alter the field of view. It is the responsibility of the owner to understand how these changes affect the operation of these systems.

- **This Product is Intended for Off-Road Use**
All liability for installation and use rests with the owner.

- **WARNING: Careless Installation Can Result in Serious Injury or Property Damage**
 - Wear eye protection.
 - Disconnect the battery before doing any work on the vehicle.
 - Work on flat level ground.
 - Ensure truck is properly supported by jack stands. Never work under a vehicle supported only by hydraulic jacks.
 - Take precautions when lifting product. Due to the size and weight of this product three people are recommended for installation.
 - Never work directly under the product until it has been securely fastened to the vehicle.
 - Avoid sharp, hot, and moving components when routing electrical cables.
 - If drilling inspect both sides of the surface and remove/relocate any objects located in the way.
 - Ensure all bolts are properly tightened before driving.

Bumper Removal

- 1:** Disconnect the wiring to any lights, sensors, or other accessories mounted to the stock bumper. If equipped, remove the adaptive cruise control sensor located left of the license plate mount.
- 2:** Remove the bolt tab from each side that fasten the corner support to the frame.

- 3:** With the bumper supported remove the two covers on each of the tow hooks and remove the eight bolts. The bumper can now be removed.

- 4:** Remove the eight bolts that fasten the upper bumper brackets and tow hooks to the frame. Remove the four bolt tabs that fasten the lower bumper brackets to the frame. The four bolt tabs will be reused during installation.

Bumper Preparation

- Before painting open every box and locate all parts. There are several smaller bushing pieces, screens, and bolt tabs that are packaged separately inside the main box.

- **CAUTION:** Kelderman Mfg. Inc. cannot guarantee correct out of the box fitment across all light brands and sizes. The installer is responsible for test fitting all lights into the bumper and making any required modifications before the bumper is sent to paint. This bumper has been designed to utilize the following Rigid Industries lights.
 - Rigid Industries E-Series 20" Light (Center)
 - Rigid Industries E-Series 4" Light (End Cap)

- **Tow Hook Pocket Painting**
 - If a heavily textured thick coating is being applied, take note that buildup does not hinder the installation of the tow hooks. Each bumper is supplied with four rubber washers to let tow hooks rotate without damaging the paint. If thick coatings are applied, installation of hooks may only allow for the use of one or no rubber washers.

Bumper Assembly

- On a clean flat non-scratching surface, place the bumper center section (1) face down.
- Insert bumper mount bolting tabs (27) thru each pocket in the center section. Use tape or zip ties to temporarily hold in place.

- Install the tow hooks (6) into the pockets using the provided 7/8"-9 hardware. Tow hooks and rubber washers (5) go inside the pocket. Tighten the 7/8" nut (7) to the point where the tow hook will still spin but not freely.

- Bolt the three upper and lower screens into the center section (8, 9 & 16) using the supplied $\frac{1}{4}$ "-20 hardware (10, 11 & 12).

- **NOTE:** If your truck has an adaptive cruise control sensor, install the adaptive cruise screen assembly (item 13 for 2017-2019, item 39 for 2020+) in place of the driver's side screen (8).

- Bolt the end caps onto the center section using the supplied $\frac{3}{8}$ "-24 hardware. Position the tops flush with the center section (*re-positioning may be required after*

bumper is installed onto truck). **NOTE:** While positioning use masking tape to protect painted surfaces that come into contact.

- Install the Rigid Industries E-Series 20" light bar (or similar light) into the center cut out using the hardware supplied with the light (or if optioned install the Kelderman center light delete screen using the hardware supplied with the light delete kit).
- Install the lights into each end cap (or if optioned, install the Kelderman end cap light delete screen using the hardware supplied with the light delete kit).
 - Install horizontally two Rigid Industries 4" E-Series light (or similar light) into each end cap using the hardware supplied with the light.
 - **NOTE:** The light mounting ears will deform and draw up tight to the light as they are tightened.

- Zip tie wiring to the tie downs welded inside the bumper.
- The Bumper is now ready for installation.

Bumper Installation

- 1:** Install the bumper frame brackets (26). Use the provided 9/16" bolts, nuts and washers (31, 32 & 33) to bolt thru the top of the frame. Re-use the bolt tabs from *step 4* in the "Bumper Removal" section to bolt thru the sides of the frame.

- 2:** Use the studs of the bumper mount bolting tabs (27) to position the bumper on the frame brackets. Use provided 1/2" washers and nuts (29 & 30) to fasten the bumper to the mount.

3: Insert the remaining ½" hardware thru the bumper and bracket.

4: Align the bumper on the truck and tighten the mounting hardware. **NOTE:** the end caps can be re-adjusted at this point if required.

5: Torque all fasteners according to the chart below.

Bolt Size	Torque
1/4"-20	70 in-lb
3/8"-16	20 ft-lb
1/2"-20	50 ft-lb
9/16"-18	70 ft-lb
7/8"-9	250 ft-lb

6: Finish wiring accessories.

Parts Key

Item Number	Part Number	Description
1	32002	Center Section
3	12644	Bolt: 7/8"-9 X 7.00"
4	13010	Flat Washer: 7/8"
5	80043	Rubber Washer: 1" ID X 2" OD
6	31552	Tow Hook
7	13110	Lock Nut: 7/8"-9
8	10008104	Honeycomb Outer Screen -7"
9	10008105	Honeycomb Inner Screen - 8"
10	12108	Bolt: 1/4"-20 X 3/4"
11	13000	Flat Washer: 1/4"
12	13100	Lock Nut: 1/4"-20
13		2017-2019 Ford Adaptive Cruise Sensor
14	10008109	Adaptive Cruise Honeycomb Screen (<i>Optional</i>)
15	32043	Adaptive Cruise Standoff Bushing
16	10008106	Honeycomb Lower Screen
17	31569	Light Delete Screen Center (<i>Optional</i>)
18	31566	Light Delete Screen End Cap (<i>Optional</i>)
19	32024	End Cap (DS) Stock Width
20	32025	End Cap (PS) Stock Width
21	32026	End Cap (DS) Wide Width
22	32027	End Cap (PS) Wide Width
23	12210	Bolt: 3/8"-24 X 1-1/4"
24	13002	Flat Washer: 3/8"
25	13102	Lock Nut: 3/8"-24
26	32020	Bumper Frame Mount
27	31760	Bumper Mount Bolting Tab
28	12007	Bolt: 1/2"-20 X 1-1/2"
29	13004	Flat Washer: 1/2"
30	13124	Lock Nut: 1/2"-20
31	12307	Bolt: 9/16"-18 X 1-3/4"
32	13005	Flat Washer: 9/16"
33	13125	Lock Nut: 9/16"-18
34		2020+ Ford Adaptive Cruise Sensor
35	10008111	Adaptive Cruise Honeycomb Screen (<i>Optional</i>)
36	10006654	Adaptive Cruise Standoff Bushing
