Introduction

- **Important**

It is important that the entire installation instructions be read thoroughly before proceeding with bumper installation.

- **Product Installer Responsibilities**

Installer is responsible for installing this product in accordance with Kelderman Mfg. Inc. specifications and installation instructions.

Installer is responsible for providing proper installation of vehicle components and attachments as well as required or necessary clearance for suspension components, axles, wheels, tires, and other vehicle components to ensure a safe and sound installation and operation of this product.

- **Product Owner Responsibilities**

Owner is solely responsible for pre-operation inspection, periodic inspections, maintenance, and use of the product as specified by Kelderman Mfg. Inc. Of particular importance is the re-torque of fasteners. This re-torque must be performed within 90 days or 1000 miles of this product being put into service.

- **Definition of Terms**

- **Warning:** Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.
- **Caution:** A potential hazardous situation may result in property damage.
- **Note:** Provide information or suggestions that help correctly perform a task.
- **Torque:** When italicized "*torque*" alerts the installer to tighten fasteners to a specified value.

Safety

- **Your Safety and the Safety of Others is Very Important.**
Read and understand all safety precautions and instructions before installing this product.

- **CAUTION: Trucks Equipped with Parking Sensors or Other Like Devices.**
Relocation of these devices will alter the field of view. It is the responsibility of the owner to understand how these changes affect the operation of these systems.

- **This Product is Intended for Off-Road Use**
All liability for installation and use rests with the owner.

- **WARNING: Careless Installation Can Result in Serious Injury or Property Damage**
 - Wear eye protection.
 - Disconnect the battery before doing any work on the vehicle.
 - Work on flat level ground.
 - Ensure truck is properly supported by jack stands. Never work under a vehicle supported only by hydraulic jacks.
 - Take precautions when lifting product. Due to the size and weight of this product three people are recommended for installation.
 - Never work directly under the product until it has been securely fastened to the vehicle.
 - Avoid sharp, hot, and moving components when routing electrical cables.
 - If drilling inspect both sides of the surface and remove/relocate any objects located in the way.
 - Ensure all bolts are properly tightened before driving.

Bumper Removal

- 1:** Disconnect the wiring to any lights, sensors, or other accessories mounted to the stock bumper.
- 2:** Remove the front bumper, bumper brackets and tow hooks *(if optioned)*. **CAUTION:** Only remove the three bolts per side that fasten thru the bumper brackets.

- 3:** Remove the front two bolts from the bottom flange.

Bumper Preparation

- Before painting open every box and locate all parts. There are several smaller bushing pieces, screens, and bolt tabs that are packaged separately inside the main box.
- **CAUTION:** Kelderman Mfg. Inc. cannot guarantee correct out of the box fitment across all light brands and sizes. The installer is responsible for test fitting all lights into the bumper and making any required modifications before the bumper is sent to paint. This bumper has been designed to utilize the following Rigid Industries lights.
 - A) Rigid Industries E-Series 20 Inch Light (Center)
 - B) Rigid Industries E-Series 4 Inch Light (End Cap)

Bumper Assembly

- On a clean flat non-scratching surface place the bumper center section (1) face down.
- Bolt the three upper screens (2 & 3) into the center section, using the supplied 1/4" hardware (4, 5, & 6)

- Bolt the lower screen (7) into the center section, using the supplied 1/4" hardware (4, 5, & 6).

- Light Bumpers
 - Install the Rigid Industries E-Series 20 inch light bar (or similar light) into the center cut out using the hardware supplied with the light.
 - Or if optioned install the Kelderman center light delete screen (8) using the hardware supplied with the light delete kit.

- Bolt the end caps (9 & 10) onto the center section using the supplied hardware (11, 12, & 13). Re-positioning may be required after bumper is installed onto truck.

NOTE: While positioning use masking tape to protect painted surfaces that come into contact.

- Install the lights into each end cap.

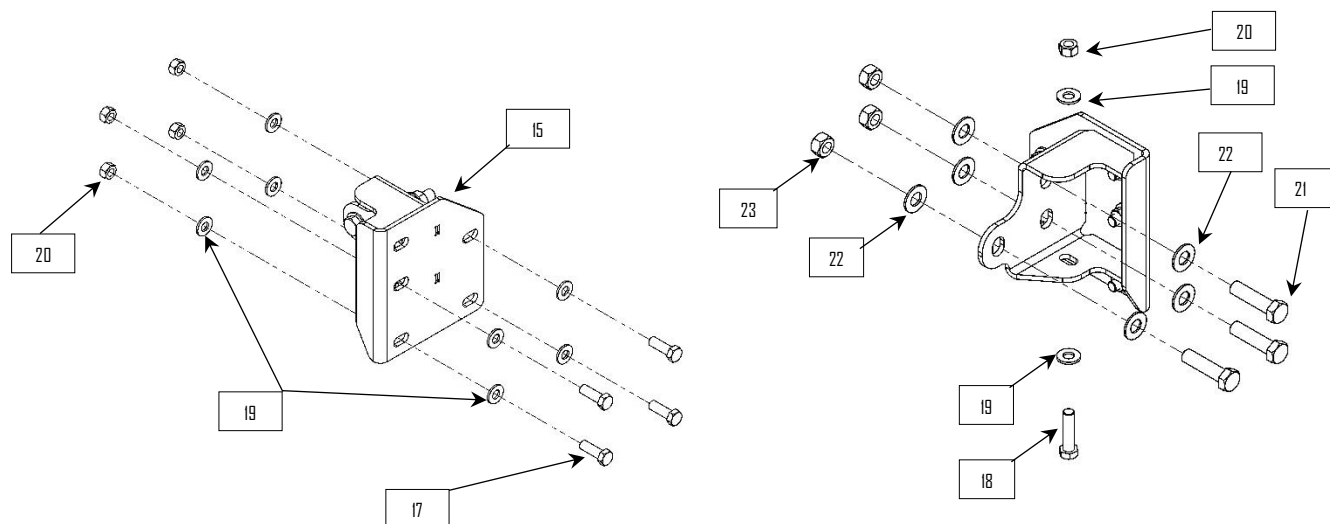

- Install two Rigid Industries 4 inch E-Series light (*or similar light*) into each end cap using the hardware supplied with the light.
 - **NOTE:** The light mounting ears will deform and draw up to the light as they are tightened.

- Or if optional, install the Kelderman end cap light delete screen (14) using the 1/4" hardware supplied with the light delete kit.
- Zip tie wiring to the tie downs welded inside the bumper.
- The bumper is now ready for installation.

Bumper Installation

- 4:** Use 5/8" hardware (21, 22, & 23) to bolt the bumper brackets (15 & 16) into the frame horns. Use 1/2" hardware (18, 19, & 20) to fasten thru the bottom flange.

- 5:** Install bumper bracket (16) on the passenger side and bumper bracket (15) on the driver side.
- 6:** Use 1/2" hardware (17, 19, & 20) to fasten the bumper to the frame brackets.

7: Align the bumper on the truck and tighten the mounting hardware. Slowly open the hood and check that it clears the bumper. **NOTE:** The end caps can be re-adjusted at this point if required.

8: Torque all fasteners according to the chart below.

Bolt Size	Torque
1/4"-20	70 in-lb
3/8"-16	20 ft-lb
1/2"-20	50 ft-lb
9/16"-18	70 ft-lb
7/8"-9	250 ft-lb

9: Finish wiring accessories.

Parts Key

Item Number	Part Number	Description
1	10007539	Center Section - Bravo
2	10008104	Outer Screen (7")
3	10008105	Inner Screen (8")
4	12108	Bolt: 1/4"-20 x 3/4"
5	13000	Flat Washer: 1/4"
6	13100	Lock Nut: 1/4"-20
